PROFILE

Penultimate Banking & Finance undergraduate at NTU with a keen interest in asset management, portfolio analysis, and market research. Skilled in financial modelling and performance analysis, with a creative problem-solving open mindset.

EDUCATION

Nanyang Technological University

Aug 2024 - Jun 2027

Bachelor of Business with a Minor in International Trading, Class of 2027

- Cumulative GPA: First-Class Honours (4.61/5.00)
- Relevant Coursework:
 - **A+** in Financial Accounting, Principle of Economics, Python, Statistics & Analysis.
 - **A** in Investments, Managerial Accounting; **A-** in Financial Management

WORK EXPERIENCE

Whitman Independent Advisors

May 2025 - Aug 2025

Wealth Management Assistant

- Automated fund factsheet data extraction using Power Automate and AI Builder, replacing manual copy-paste workflows with structured Excel pipeline and reducing processing time per factsheet from 3 minutes to 20 seconds.
- Developed an Excel VBA tool to automate cross-fund holdings analysis, identifying overlapping equity exposures across 200+ unit trusts and reducing manual portfolio comparison time by ~80%, improving visibility into concentration risk and institutional positioning.

EXTRA-CURRICULAR ACTIVITIES

Eurasia Asset Management Challenge (EAMC) 2026

Feb 2026 - Mar 2026

Champion

- Built a 50 stocks globally diversified S-pillar Employee Welfare equity portfolio using a proprietary two-stage framework combining filtering and weighting, applying liquidity, size, ESG and financial quality screens to identify high-quality investment candidates.
- Selected and ranked investments using a composite human capital scoring model, outperforming the MSCI World Social Leaders Select Top 50 Index with 97.1% vs 90.5% returns, higher Sharpe ratio 0.94 vs 0.86 and lower maximum drawdown over a five-year back test.

CFA Institute Research Challenge 2026

Dec 2025 - Jan 2026

Participant

- Developed a BUY investment thesis on Sheng Siong by analyzing its expansion strategy and cost structure, identifying distribution center automation supporting up to ~120 stores that lowers per-unit logistics cost and drives structural margin expansion, reinforcing scalability and long-term profitability.
- Built a DCF valuation model using 2025-2029 free cash flow projections, deriving an intrinsic value of S\$2.92 per share and equity value of ~S\$4.39bn, implying 12.74% upside, supported by stable ~29-31% gross margins and ~9% EBIT margins driven by non-discretionary demand and strong cash flow resilience.

Singapore Global Money Week (SGMW) 2025 & 2026

Aug 2024 - May 2026

Project Lead

- Led end-to-end event execution, coordinating partners, speakers, and facilitators across a two-day event; initiative earned 3 of NTU Student Affairs Office's 4 major awards (Colab4Good, Tenacity, Team Spirit) for AY24/25.
- Designed an interactive financial markets simulation booth where participants made investment decisions based on market events, guiding 1,800+ attendees across NTU faculties through the decision-making logic used by traders and investors, helping participants understand how financial market participants react to news and risk.
